

QUESTION

Customs number of the product:	382440
Country of prospection:	Germany

REPLY

Sir,

We write to you in reference to your request for standards that apply to your product in Germany:

- 3824.40 : Additives prepared for cements, mortars or concrete.

Please find below the standard in force in Germany that applies to your product:

- DIN 1100

Description: Hard aggregates for cement-bound floor screeds - Requirements and test methods

Scope: This standard specifies the requirements for hard materials which are used as aggregates for cement-bound floor screeds in order to give them high tensile strength and resistance to surface abrasion. The standard also contains methods for the testing of requirements and rules for quality control.

We inform you that our source for this search is the German norm institute (DIN).

We hope that this information will be useful to you. We remain at your disposal, should you require further information.

Best regards,

Emporiki Trade Team
